INSTRUCTIONS CONCERNING MEAT INSPECTION.

Extension of Time for Compliance with Regulation Requiring Separation of Edible and Inedible Products.

By order of the Secretary of Agriculture, the time allowed by the Regulations governing the meat inspection of the United States Department of Agriculture (B. A. I. Order 150) for compliance with the provisions of section 1 of Regulation 16 is extended for sixty days from October 1, 1908. Inspectors in charge will notify all parties concerned at their respective stations.

Use of Condemned Fats for Industrial Purposes Without Denaturing.

Lard, tallow, stearin, lard compound, lard substitute, and similar products which are condemned on account of rancidity or for similar cause rendering them unfit for food may be used for industrial purposes without denaturing, provided they are properly marked "Inedible" and the following conditions are complied with: When it is desired to remove such condemned product beyond the jurisdiction of the inspector in charge of the establishment where it was condemned, the inspector shall be furnished with a written statement by the owner giving the amount of the product, the use for which it is intended, and the name and address of the concern that will use it for industrial purposes, also with a copy of the bill of lading when the product is shipped. The inspector in charge will report in full to the Washington office concerning all condemned products disposed of in this manner.

Hams with Marrow Sour.

Hams with marrow sour, but otherwise sound and wholesome, may be passed after thoroughly removing the sour marrow by burning or by the use of live steam after the hams are smoked.

Domestic Meat Labels on Burlap-covered Barrels.

Domestic meat labels may be affixed to the sides of barrels covered with burlap, provided the hoops afford sufficient protection for the labels.

Labeling Sausage Containing Cereal.

In view of the numerous instances in which sausage containing cereal has been permitted to leave official establishments in improperly marked containers, inspectors in charge of meat inspection are directed to take such steps as may be necessary to enforce a strict compliance with the provisions of section 13 of Regulation 18, B. A. I. Order 150. The container of a meat food product to which a cereal has been added, except veal loaf and similar products the names of which indicate the presence of cereal, shall bear a statement showing the addition of cereal, and such statement shall be incorporated in the label or printed matter on the container and in direct connection with the name of the product. The use of stickers for this purpose is not permissible.

Establishment Numbers Embossed on Containers.

In view of the requirement of the regulations that certain containers of meat or meat food products shall have the number of the official establishment embossed, lithographed, or printed thereon, the bureau has no objection to omitting the establishment number from the trade labels applied to such containers, provided the containers are wrapped so as not to cover the embossed establishment

number. In case the embossed establishment number is covered by a trade label or other wrapper, the establishment number shall appear on the trade label as well as on the container.

Marking of Tubs and Similar Containers of Lard, etc.

Inspectors in charge of meat inspection are directed to require that upon the sides of tubs and similar containers of lard, lard compound, and substitutes for lard there shall be prominently displayed the true name of the product and ingredients, so that when the cover or head, to which such marks of identification are usually affixed, is removed, the nature or identity of the product will not be lost.

Use of "F. L. P." on Meats.

The prohibition of the use on meats of a preparation known as "F. L. P." (see Service Announcements of June 15, 1908, bottom of page 61) will not apply to packages of that preparation which show the date of August 1, 1908, printed at the bottom of the label on the portion bearing the letters "F. L. P." in 1-inch type.

SUBSTANCES PERMITTED FOR OFFICIAL DIPPING.

The use of the following-named substances is permitted by the Department in the official dipping of sheep for scabies:

"*Felker's Dip*," a coal-tar creosote dip, manufactured by W. A. Felker, Quincy, Ill. Dilution permitted, 1 gallon of Felker's Dip to not more than 67 gallons of water.

"*Imperial Sheep Dip*," a coal-tar creosote dip, manufactured for the Western Wholesale Drug Company (Incorporated), Los Angeles, Cal. Dilution permitted, 1 gallon of Imperial Sheep Dip to not more than 56 gallons of water.

"*Pioneer Stock Dip*," a coal-tar creosote dip, manufactured by the Pioneer Stock Dip and Remedy Company, Kansas City, Mo. Dilution permitted, 1 gallon of Pioneer Stock Dip to not more than 63 gallons of water.

"*Triosol Dip*," a coal-tar creosote dip, manufactured by the Gold Coin Chemical Works, St. Paul, Minn. Dilution permitted, 1 gallon of Triosol Dip to not more than 76 gallons of water. This dip should not be confused with Trinol, a cresol dip manufactured by the Gold Coin Chemical Works, St. Paul, Minn., the use of which dip was authorized in official dipping in Service Announcements of August 15, 1908, page 82. Only those packages which are labeled Trinol may be diluted in proportion of 1 gallon to not more than 115 gallons of water. Packages labeled Triosol Dip (the dip here authorized) should be used only in the proportion of 1 gallon to not more than 76 gallons of water.

Inspectors will not permit the use in official dipping of packages of these dips which are not labeled in accordance with the above specifications, nor will they permit the use in official dipping of any proprietary dip which does not bear the guaranty required of manufacturers by the regulations, B. A. I. Order 143 and amendments thereto, or which in any manner violates the provisions of said regulations or amendments.

ORDERS REGARDING POLITICAL ACTIVITY.

The attention of all bureau employees is called to General Orders Nos. 124 and 125 of the Secretary of Agriculture, dated, respectively, September 18 and September 3, 1908, the former relating to reinstatement of employees in the classified service who resigned with a view to running for office or indulging in political activity, and the latter containing rules and regulations of the Civil Service Commission pertaining to political assessments and partisan political activity of officeholders in the classified service. Copies of these orders have been supplied to all stations and instructions issued that they be so posted or distributed that every employee may see them.

Correspondence Regarding Return of Spoiled Meat.

As all correspondence regarding the return of spoiled meat (No. 44) is filed under the name of the establishment from which the product originated, or to which it is returned, it is necessary that each letter concerning such product should be confined to the product of one establishment. Information concerning a number of shipments to one establishment may be grouped in one letter.

PUBLICATIONS IN SEPTEMBER.

[Publications intended for employees are sent in bulk to inspectors in charge at the different stations, and no mailing list of individual employees is kept. Owing to the limited editions and the large number of bureau employees, as a rule only sufficient copies are sent to supply the veterinarians. Inspectors in charge will therefore see that the veterinary inspectors are first supplied, and if more copies are received than are necessary for this purpose the excess may be distributed to others. Requests from employees for publications will be complied with as far as practicable. Regulations will be supplied to inspectors in charge as freely as may be required for official use.]
